Helium User Guide (Party Helium to Buy)

Helium User Guide (Party Helium Tanks)

All our cylinders and tanks are very simple to use. By following these simple instructions you should be able to use the Party Helium effectively and safely. If you still have trouble, please give us a call and we will do what we can to help. Latex balloons will stay afloat with helium for around 8-12 hours. Foil balloons will stay afloat for around 2-5 days

- 1) Pull the tear strip to open the box.

- 2) Flip open the lid and store the balloon and ribbon conveniently at hand.

- 3) Turn the tap anti-clockwise to open the helium tank.

- 4) Place the neck of the balloon onto the filling nozzle making sure there is a snug fit.

- 5) Hold the balloon neck on the nozzle and tilt the nozzle up or down to release the helium.

6) Release the nozzle to stop the release of gas and remove the balloon keeping a tight hold of the balloon neck.

7) Tie a knot in the balloon.

8) Tie the ribbon onto the balloon neck.

9) When you have finished inflating your balloons, turn the tap clockwise to turn the tank off.
